ABOUT ME

Software Engineer with 7 years of experience building backend services, APIs and web applications for e-commerce, retail (POS), media and telecom. Works across Node.js (Express, TypeScript) and Python (FastAPI, Django, Flask), from API design through deployment. Writes automated tests and ships through CI/CD pipelines, so services stay reliable as they grow.

PROFESSIONAL EXPERIENCE

Test Automation Engineer, Xtela **Nov 2024 - Present**

- Designed, maintained and scaled a Playwright and TypeScript automation framework covering UI, API and integration testing across multiple applications.
- Built Node.js and Python tools and scripts for test data, test reporting and internal workflow automation.
- Built and tested internal portals and REST APIs connecting web apps, mobile clients and microservices.
- Integrated automated regression, smoke and integration suites into CI/CD pipelines so defects surface on every commit.

Software Development Engineer, Ooredoo Myanmar **Oct 2023 - Mar 2024**

- Engineered backend APIs for fast, reliable data retrieval, storage and processing across web and mobile platforms.
- Built Point-of-Sale (POS) systems handling transactions, sales tracking, stock management and order processing.
- Developed e-commerce platforms with secure transactions and a scalable foundation for online sales.
- Collaborated with cross-functional teams on planning, system architecture and delivery.

Backend Developer, MOC Interactive **Jul 2022 - Sep 2023**

- Built e-commerce backends with product catalogues, shopping carts and secure payment integrations.
- Owned DevOps duties: automated deployments, monitored system health and resolved production incidents.
- Designed new features and optimised existing services for speed and stability.

Backend Developer, Vidya Media **Sep 2020 - Jun 2022**

- Developed and maintained the backend and mobile application for the Vidya Media platform.
- Hardened security and performance, and shipped new features end to end.
- Supported deployment and infrastructure workflows to keep services consistently available.

Junior Python Developer, Nexidea **Oct 2019 - Aug 2020**

- Developed Python web applications and backend services as part of the engineering team.
- Built REST APIs and database models with Django and Flask, working closely with senior engineers.
- Fixed bugs, wrote unit tests and took part in code reviews to follow the team's coding standards.

TECHNICAL SKILLS

Node.js / Express	RESTful API design	Docker
Python (FastAPI, Django, Flask)	Microservices	AWS / DigitalOcean
TypeScript / JavaScript	Payment and checkout flows	GitHub Actions
Go	SQL / NoSQL databases	GitLab CI/CD
PHP (Laravel)	Schema design, query tuning	Jest / Playwright
Tornado	EmberJS (front end)	Git

EDUCATION

Bachelor of Science in Computing
Edinburgh Napier University

- Coursework in software development, databases, networking and system design.

SELECTED PROJECTS

- **Zipp Bike** — online shopping platform: catalogue, cart and checkout.
- **Vidya Media Application** — media platform backend and mobile app.
- **My Leads** — call centre management system.
- **Alibaba Myanmar System, Deltamate System, Unilink Application** — business systems for clients.
- **Lexis** — abacus learning game.

ADDITIONAL INFORMATION

- **Languages:** English (professional), Burmese (native).
- **Strengths:** API design, system architecture, Agile delivery, cross-functional collaboration.
- **Portfolio:** shunainghtet.github.io
